

HOW TO EMBROIDER ONTO THE W818 EARTHWARE® ORGANIC YOGA TOTE

- Select your design and prepare for embroidery, we are using a Melco EMT16X embroidery machine in this example.
- Measure and mark where you would like your embroidery design to be positioned using tailors chalk – here we are using the front sleeve of the W818.
- Select an embroidery hoop relative to the size of the design. Using suitable backing paper, attach the hoop through the front sleeve of the bag.
- Load the hooped product into the machine, so the bag hangs below, and the embroidery carriage is inside the front sleeve - centre and rotate accordingly, then run the design.
- Once the design is finished, remove hoop, trim the backing and any loose threads.
